

Metaverse Assets Liquidation
Aggregator for Everyone

Everything is Collateral

Regardless of whether they are NFTs or altcoins with liquidity issues, valuable assets require sustainable solutions for unlocking liquidity. We have solved that.

Evolvable Metaverse Lending solution

Our evolution is your evolution. Metaverse Epoch is coming with unpredictable forms. Our highly-flexible solution will fit the requirements of Metaverse.

Pain Points of current lending markets

**NFT as collateral?
Not Accepted**

NFTs can not be used as collateral

Everybody knows NFT is amazing, NFT is the key foundation for Metaverse but currently almost no lending platforms treat NFTs as stable and valuable assets.

**AltCoins?
Too Risky**

Huge value are locked in Altcoins but refused as the collateral

New projects are born everyday, their tokens are trading. However people can hardly find a place to unlock the liquidity of these assets due to the risk aversion of current lending platforms.

**Big Change?
No!**

Lending industry develops fast but incumbent players are slow to catch up

Most of current lending platforms are used to stable business models with few motivations to take big innovation. Taking traditional funds into the crypto is a safe direction but people also need solutions flexible enough to fit the changing trends and requirements needed.

Solution Matrix

XBroker

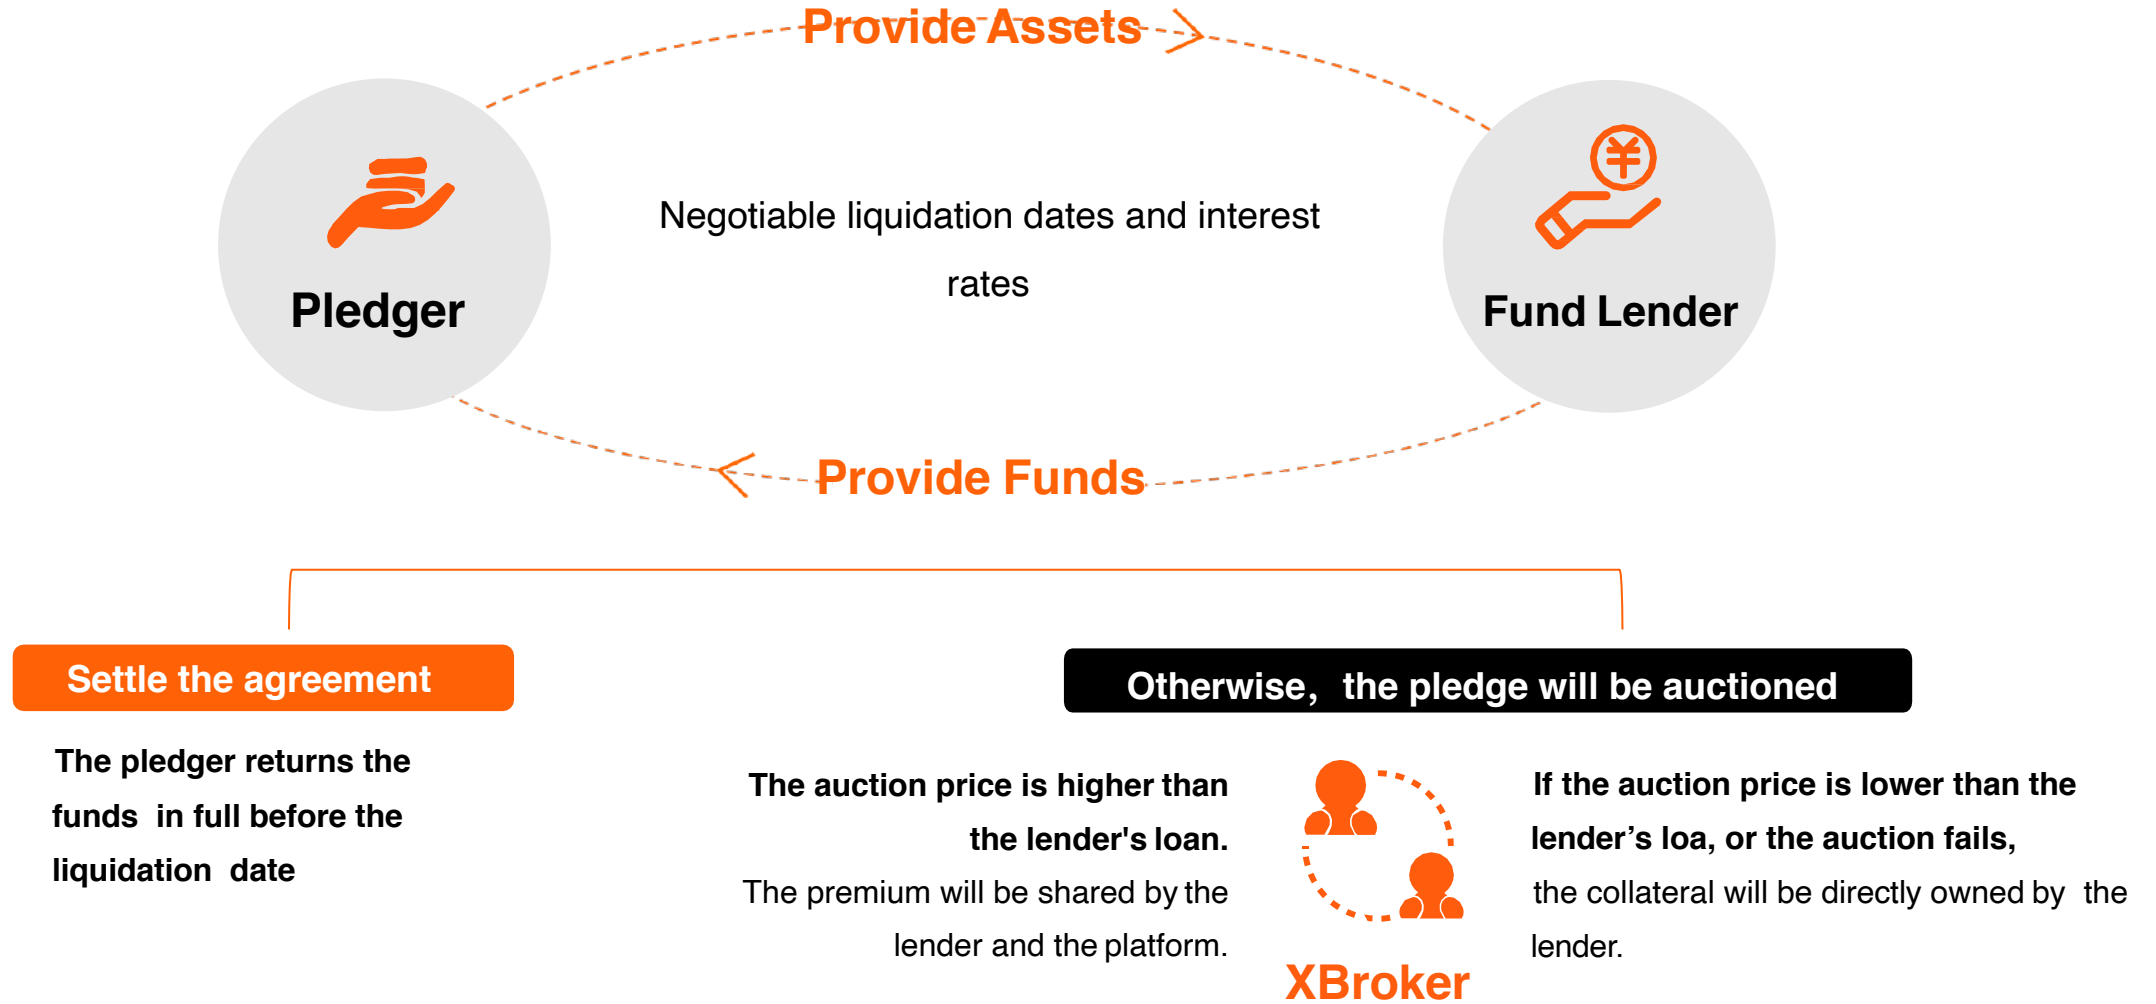

XCarnival's original time-limited auction clearing mechanism. The pledge model is optimized for special types of assets with extremely poor liquidity, such as NFTs.

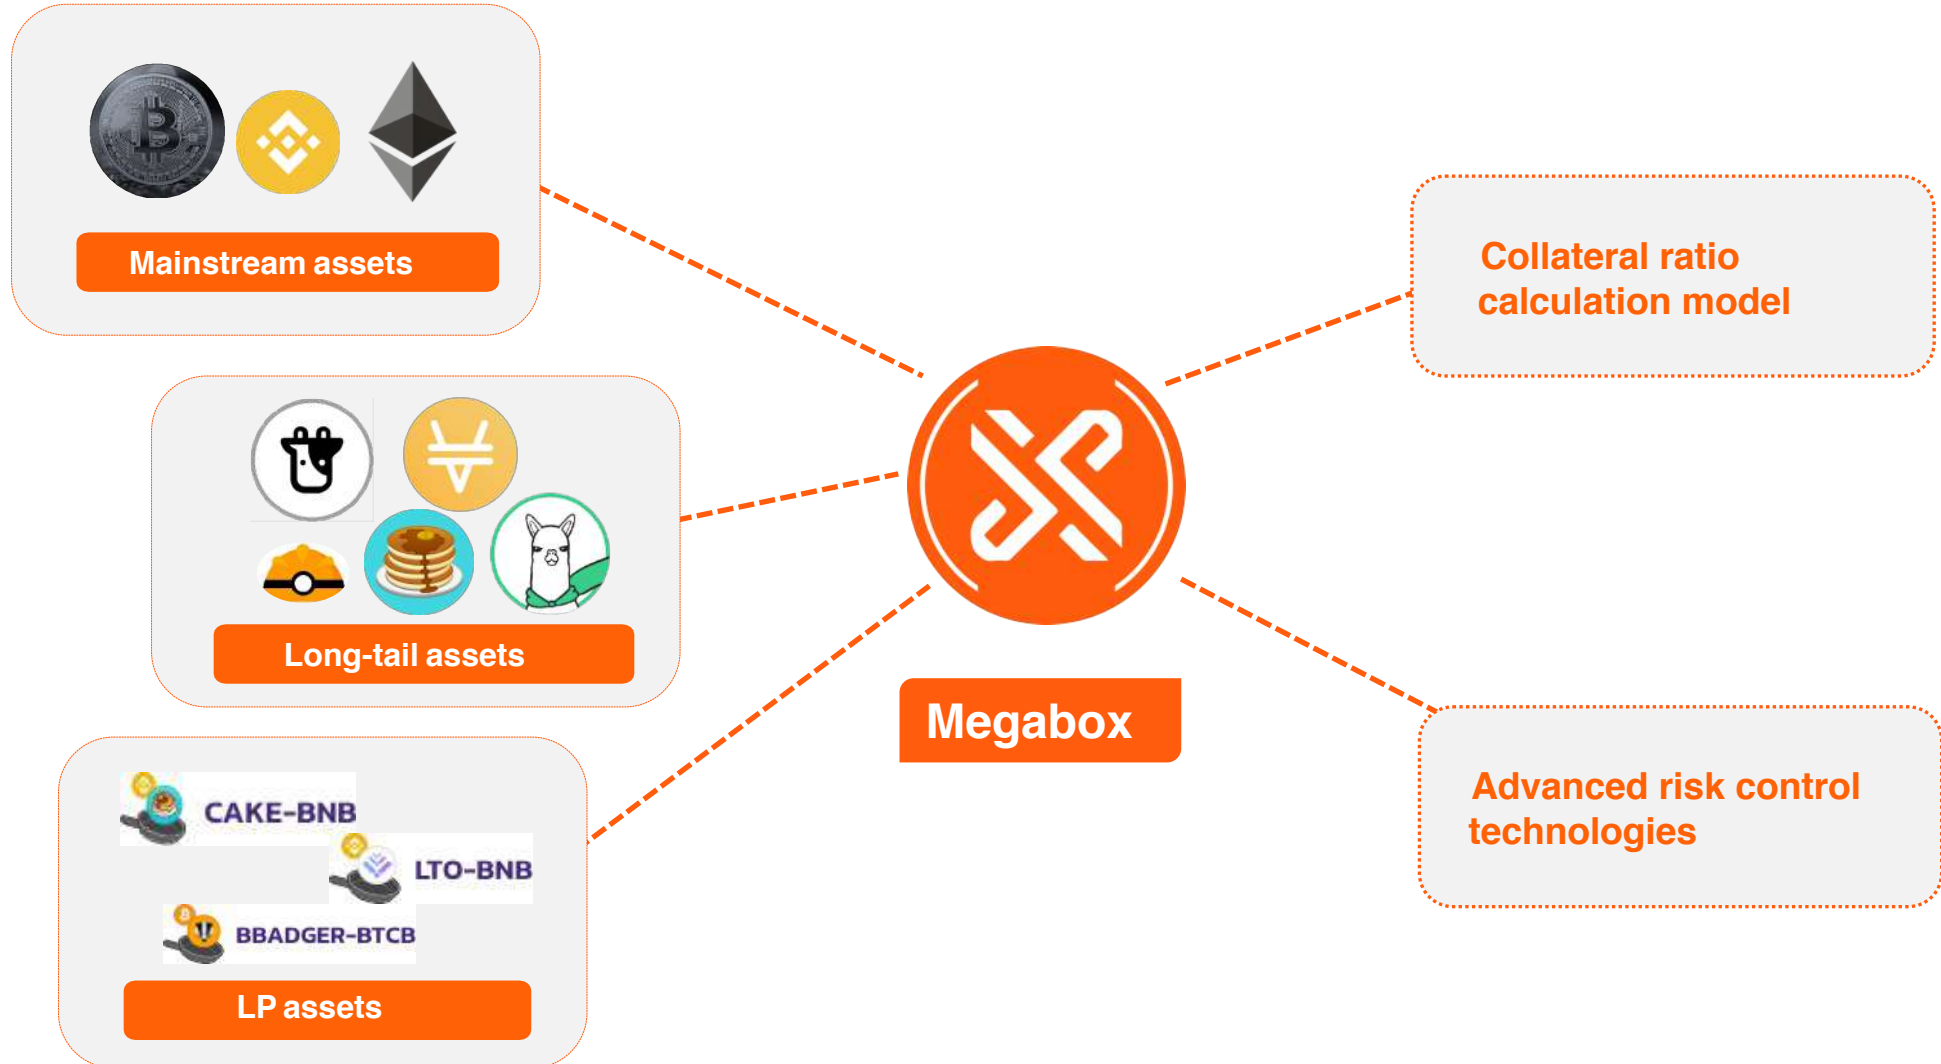

Megabox

Allows users to unlock the liquidation of their long-tail assets which have relatively limited liquidity (such as Altcoins and LPs).

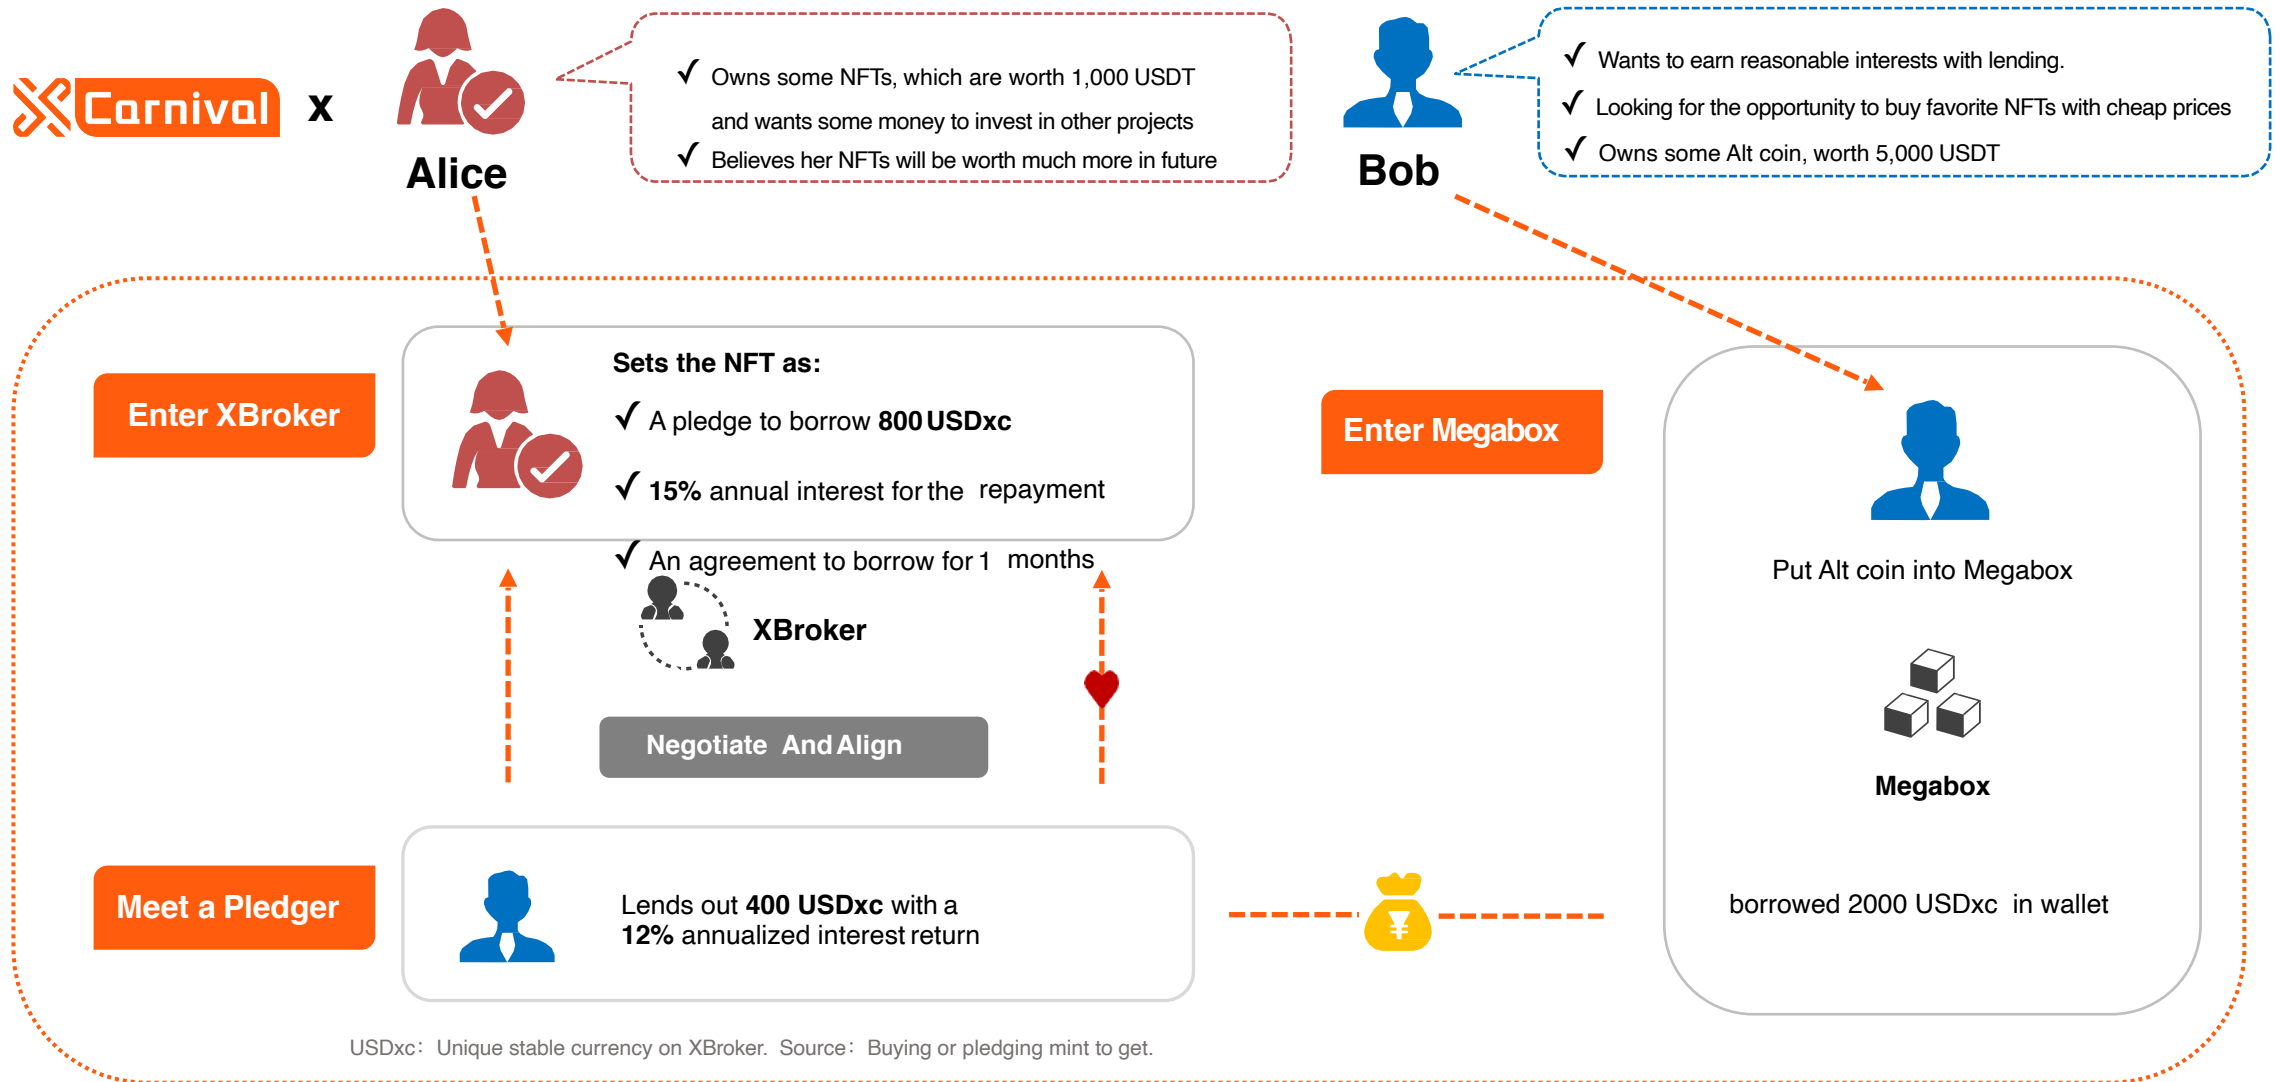

What is XBroker ?

What is Megabox ?

How does XCarnival Work?

XCarnival's 4 Competitive Advances

XCarnival's products could be used for lending and pledging of all kinds of NFTs, including celebrity NFTs, Virtual identity, financial NFTs, and Loyalty NFTs. Its third-party platform operating model can contain the risks within each transaction, so as to avoid systemic risks and bad debts.

Through its mining mechanism, the XCarnival platform allows users to form a habit with NFT pledging and lending, which is one of the first in the industry, with first-to-market advantages.

With rapid development of the NFT market, lending & Pledging is the infrastructure of the industry, with huge potentials and demand.

XCarnival believes "Everything is collateralized", which is in line with the development of Metaverse. XCarnival is already working with Metaverse projects to provide liquidity, such as the exclusive lending and pledging services for USM's NFTs in the metaverse.

XCarnival Interface Display

The Metaverse Assets Liquidation Aggregator for Everyone

XCarnival is an aggregator for synthetic decentralized finance (DeFi) assets that provides the masses on-chain exposure to a wide variety of crypto and non-crypto assets.

XBroker
Put your NFT assets up as collateral for a loan, or offer loans to other users on their non-fungible tokens.

- Unique Value Proposition**
Put any ERC-20 token up for collateralization. Other users can now offer you a loan.
- Get attractive returns**
Browse your favourite NFTs and offer loans on assets you're happy to back.
- Bid for your favourite NFTs**
Browse your favourite NFTs and place a bid.

Megabox
Long-tail assets lending platform. Users could unlock the liquidity of their long-tail assets with relatively limited liquidity (such as Altcoins and LTV).

Roadmap

【2020 Q4】

- Concept Creation
- Team Construction
- Idea Optimization

【2021 Q1】

- Verify the main logistic of the project
- Design the main structure of XCarnival
- Develop the smart contract for mainstream asset collateral
- Megabox function developed

【2021 Q2】

- Develop collateral ratio evaluation model with price trace function
- Develop the liquidation mechanism of normal crypto assets (altcoins) and abnormal crypto assets(NFTs)
- Develop the time-limited auction clearing mechanism
- XBroker function developed

【2021 Q3】

- Smart Contract audit
- Bounty program set up
- Testnet launch on BSC chain
- NFT mystery box design
- Mainnet launch and Farming launch

【2021 Q4】

- Multi-chain develop and deploy – ETH L2 solution
- DAO build up
- Cex listing
- Loyalty NFT system build up
- Xbroker V2 development
